

Commercial Office Industry Nx-ON Antimicrobial Technology

EPA
Registered

USDA
Accepted

By applying Nx-ON's disinfectant/microbiostatic agent coating, all surfaces will be rendered 99.9% germ free due to our disinfectant. The Nx-ON microbiostatic coating works continuously and provides an invisible bio-static layer of protection to prevent the spread and growth of odor causing bacteria and fungi (mold and mildew), bacteria and fungi (mold and mildew) which cause staining and discoloration, and algae between regular cleanings.

- Water Based ·USDA Aproved ·Odorless and colorless ·Protects a wide range of surfaces ·Highly durable ·Non-toxic technology after drying
- Non-leaching, mechanical method of efficacy
