Nx-ON Antimicrobial Technology

EPA
Registered

USDA
Accepted

By applying Nx-ON's disinfectant & microbiostatic agent coating, all surfaces will be rendered 99.99% germ free due to our disinfectant.

The Nx-ON microbiostatic agent coating inhibits the growth of bacteria, fungi (mold and mildew), which cause odor, staining and dis-coloration, and odor

The affordable application by our licensed technicians provides a long-term protective coating.

Nx-on® has certificates and marketing materials available to strengthen your position as a high quality organization.
