

Transportation Industry

Nx-ON Antimicrobial Technology

EPA
Registered

USDA
Accepted

The Nx-ON® antimicrobial technology provides a durable, invisible microbiostatic coating to inhibit the growth of bacteria (which cause odor, staining, and discoloration) fungi, algae, mold, and mildew in transportation vehicles.

The affordable application by our licensed technicians provides a long-term protective coating. Nx-ON® has certificates and marketing materials available to strengthen your position as a high quality provider.

- EPA Registered •USDA Accepted
- Odorless and Colorless •Highly-Durable
- Non-leaching •Prevents biofilm buildup

•Highly desirable by vehicle operators and passengers
